

The world's first self-adjusting table - no wobble and completely stable

Wobbly tables in your restaurant, cafe, bar or terrace are annoying; not just for your guests, but also for you and your staff. The unsatisfactory solution to this annoyance usually consisted of a few coasters. Or adjustable tables that are expensive, laborious and usually still unstable. But now there is the RoXTable; the first table to adjust itself once placed on the ground with all four legs firmly planted onto any surface! And all this for a very reasonable price. Too good to be true? Contact us for more information or a demonstration of the RoXTable at your establishment.
